CORE SKILLS

React · TypeScript · JavaScript · Python · Tailwind CSS · Supabase · PostgreSQL · Node.js · REST APIs · Git/GitHub · Network Security · Vulnerability Assessment · Data Annotation · RLHF · Prompt Evaluation · M-Pesa API · Vercel · Responsive Design

CERTIFICATIONS

HCIA-Security — Huawei
Cisco Networking Academy — CCNA Track
KANZ AI Hackathon — Certificate, July 2026

EDUCATION

BSc, Information Technology
Africa Nazarene University

LANGUAGES

English — C2 (Fluent)
Swahili — Native
German — B1 (Intermediate)

INTERESTS

Music curation, chess, civic technology

PROFILE

Full-stack developer and cybersecurity specialist with hands-on experience delivering production web applications, secure network architectures, and AI training data workflows. Founder of HighDesign Agency and Technical Lead at EduBridge Kenya, with a track record spanning client-facing development, operations support, technical recruiting, and virtual assistance. Comfortable working end-to-end: requirements, architecture, build, security hardening, and delivery, across React/TypeScript, Python, and Supabase-backed systems.

EXPERIENCE

Founder & Lead Developer — HighDesign Agency — 2023 – Present

Nairobi, Kenya (Remote / Client-based)

- Founded and operate a digital agency delivering web development, design, and operations services to clients including GIZ, The Moss Karen, and Kairi Tours.
- Directed end-to-end project execution, from client scoping and architecture through deployment and ongoing support.
- Built and shipped production sites and dashboards on React, TypeScript, Tailwind CSS, and Supabase.

Technical Lead — EduBridge Kenya — 2023 – Present

Scholarship facilitation platform

- Lead development of a scholarship management platform improving student access to opportunities across Kenya.
- Own secure data architecture, UX flows, and platform reliability for an active applicant base.

Freelance Developer & AI Data Contributor — 2023 – Present

Upwork / Freelancer.com

- Delivered full-stack builds, e-commerce platforms, and landing pages for international clients.
- Contributed to AI model training pipelines through data annotation, prompt evaluation, and RLHF feedback tasks.
- Sourced and validated multilingual training data (including Turkmen-language documents) under strict quality and deadline requirements.

SELECTED PROJECTS

HighDesign Agency
Agency site and client delivery pipeline. hda-website-iota.vercel.app

The Moss Karen
Business website for a Karen, Nairobi client. the-moss-karen-gold.vercel.app

Aston Electronics
Live e-commerce platform: catalog, cart, checkout, admin dashboard, security hardening.

Delisha
On-demand delivery platform (Glovo-style) for Kitale with M-Pesa integration — schema, proposal, and 10-milestone build plan.

EduBridge Kenya
Scholarship platform serving applicants nationwide with secure data flows.

TypingBot
Chrome extension automation tool.

ADDITIONAL CAPABILITIES

- **Cybersecurity:** Network security fundamentals, vulnerability assessment, RLS policy review, credential hardening (HCIA-Security certified).
- **Operations & Technical Recruiting:** Process documentation, hiring test preparation, candidate sourcing, and virtual assistance workflows.
- **AI/ML Support:** Data annotation, RLHF feedback, prompt evaluation, and quality review across multiple platforms.
- **Document & Reporting Automation:** Python/ReportLab and wkhtmltopdf pipelines for resumes, proposals, and reports.
